

Job Description: AI Engineer

Company: AI Labs

Position: AI Engineer

Job Summary:

We are looking for an AI Engineer to join our team and develop cutting-edge machine learning and deep learning models. The candidate will work on NLP, computer vision, and predictive analytics projects.

Responsibilities:

- Design, develop, and deploy AI models and machine learning pipelines.
- Work with data engineers to prepare and analyze large datasets.
- Collaborate with cross-functional teams on AI-driven solutions.
- Maintain and improve existing AI systems and algorithms.

Requirements:

- Education: B.Tech CS, M.Sc AI, or related field.
- Skills: Python, Machine Learning, Deep Learning, NLP, TensorFlow, PyTorch.
- Experience: 3+ years in AI or Machine Learning projects.
- Certifications (optional): TensorFlow, PyTorch, AWS Certified, or related.
- Strong problem-solving skills and team collaboration.

Location: Remote / On-site
